

Josée Tremblay, Vice President, East Coast, Suncor Energy

Based in St. John's, Newfoundland, Josée Tremblay is Suncor's Vice President East Coast. Josée is accountable for all of Suncor's offshore production, development and exploration on Canada's East Coast. Included in the region is the operatorship of the Terra Nova FPSO and joint-venture partnership with the Hibernia, White Rose and Hebron developments.

Before joining Suncor, Josée was an executive at INPEX Corporation, in the Projects division. Prior to that, Josée held various leadership roles with ConocoPhillips internationally and in Canada. Her deep background in asset management, operations, projects and safety leadership includes 25 years of progressive experience in the offshore and E&P industry. Josée joined Suncor as the vice president engineering in the Exploration and Production (E&P) business in 2018.

Originally from Quebec, Josée holds a Bachelor of Science in mechanical engineering from the University of Calgary, a certificate of Strategic Decision and Risk Management from Stanford School of Engineering and, an Executive Education Certificate in Finance and Accounting from Rice University.

Josée has a life-long interest in enabling access to learning and education. She's contributed to building libraries in Nepal and Vietnam and is currently working to build a bursary with the Engineering Faculty at the University of Alberta to increase access for students who require financial assistance. She is an active member of the Schulich School of Engineering Industry Advisory Council (SIAC).
