

Ryan Noseworthy, P.Eng

Ryan Noseworthy, Vice President and Development Manager for ExxonMobil Canada, is responsible for the business development strategy to maximize long term value of assets in Eastern Canada. Ryan was born and raised in Corner Brook and holds a mechanical engineering degree from Memorial University.

Mr. Noseworthy has 17 years of experience with ExxonMobil and has held several leadership and technical roles within engineering, strategic planning, operations and project management disciplines. Prior to his recent assignment, Ryan returned to St. John's from Sakhalin, Russia, where he worked as the Asset Manager for Exxon Neftegas offshore assets. In that role he was responsible for implementing all safety & environment management systems including emergency response, compliance with regulatory requirements and overall operation and reliability of the Orlan and Berkut platforms. Mr. Noseworthy has also served as a board member of Energy Research & Innovation Newfoundland & Labrador since 2020 and as Vice Chair since May 2022.

Ryan is a registered professional engineer with Professional Engineers and Geoscientists Newfoundland and Labrador, and lives in Torbay with his wife and two sons.
