Full-stack Developer

At C-CORE, we are committed to investing in people and creating a dynamic and rewarding employment experience. C-CORE is seeking a **Full-stack Developer** to join our Coresight team.

C-CORE conducts R&D and provides research-based advisory services, delivering innovative engineering and technology solutions to national and international clients. Over the past 45 years, we have built a world-class team of over 70 dedicated professionals with a reputation for excellence in: Remote Sensing and Oceans & Energy. We are looking for outstanding employees to join our team. This position is located in our St. John's, NL office.

The Position

Working with the Coresight development team, you would design & develop a variety of geospatial applications, interfaces, and data processing pipelines that contribute to the advancement of our geospatial services platform. You would communicate directly with external clients and internal stakeholders to ascertain and analyse user requirements and present appropriate solutions. You would help design interfaces that meet the needs of our stakeholders while providing a good user experience.

Qualifications
- 4+ years' experience as a full-stack developer working with React, Typescript, Python, and Postgres in a cloud environment.
- Demonstratable experience designing user interfaces and applications with justification for design decisions made.
- You have solid problem-solving skills and can work independently to solve issues.
- You can work both collaboratively and independently in a flexible working environment.

Salary & Benefits
C-CORE is committed to investing in people and creating a dynamic, rewarding employment experience. C-CORE offers competitive salaries and benefits, including attractive vacation entitlements and medical & dental plans. More importantly, we offer the opportunity for professional development, higher education, and personal growth.

Apply to
Please forward résumés of qualified candidates electronically to: careers@c-core.ca stating **Full-stack Developer** in the subject line.

Deadline to Apply
April 26, 2024

C-CORE thanks all those who apply; however, only those whose skills most closely match the position will be contacted.
